

PATOMA Labels

for professional printers

LCI

Labels for laser, copy and inkjet printing. The sheet sizes for this assortment are A4 and A5. All qualities are suitable for dry toner printing. For inkjet printing please refer to our datasheet. **3**

sheet size: A5 (21 x 14.9 cm) **4**

sheet size: A4 (21 x 29.7 cm) **5**

OFFSET

Labels for conventional offset printing are available on sheet sizes BM (22 x 15 cm), BA4 and BG (33 x 22 cm). Apart from "gold matt" and "silver matt" our series BA4 is eligible for drytoner printing as well. **12**

sheet size: BM (15 x 22 cm) **13**

sheet size: BA4 (21 x 29.7 cm) **14**

sheet size: BG (22 x 33 cm) **19**

minimum quantity for all listed products = 1 box. For more product variations and custom-made labels please contact your local sales correspondent.

All statements, technical information and recommendations are based on tests believed to be reliable but do not constitute a guarantee or warranty. All products are sold with the understanding that the purchaser has independently determined the suitability of such products for its purposes.

LCI

MATERIALS

WHITE MATT

The white, matt, wood-free, uncoated paper is suitable for all currently available copiers, laser and inkjet printers. If used in copiers and laser printers, this paper is distinguished by its optimum toner keying properties, its clear image and its high resolution. This material is equipped with a permanent adhesive.

WHITE MATT REMOVABLE

Same quality as 'White matt' but it is equipped with a removable adhesive.

WHITE MATT OPAQUE

The white, matt, wood-free, uncoated paper is suitable for all currently available copiers, laser and inkjet printers. Its reverse side is dyed opaque blue. Applications are labels where high opacity is important such as office labels for error correction or to cover-up obsolete information. This material is equipped with a permanent adhesive.

WHITE GLOSS

The white, gloss, specially cast-coated laserpaper is suitable for all currently available laser and colour laser printers. This material is equipped with a permanent adhesive.

YELLOW MATT

This wood-free, dyed paper is suitable for all currently available copiers, laser and inkjet printers. It is ideal for all applications where the use of coloured paper serves as a meaning of rapid recognition. This material is equipped with a permanent adhesive.

GREEN MATT

This wood-free, dyed paper is suitable for all currently available copiers, laser and inkjet printers. It is ideal for all applications where the use of coloured paper serves as a meaning of rapid recognition. This material is equipped with a permanent adhesive.

BLUE MATT

This wood-free, dyed paper is suitable for all currently available copiers, laser and inkjet printers. It is ideal for all applications where the use of coloured paper serves as a meaning of rapid recognition. This material is equipped with a permanent adhesive.

RED MATT

This wood-free, dyed paper is suitable for all currently available copiers, laser and inkjet printers. It is ideal for all applications where the use of coloured paper serves as a meaning of rapid recognition. This material is equipped with a permanent adhesive.

NATURAL WOOD

A natural unbleached, uncoated, laid watermarked printing paper. This product is suitable for labelling of high and premium goods eg: spirits, specialist foods. It has a 'natural' image. This material is equipped with a permanent adhesive.

VERGÉ CREME

A cream uncoated, matt, laid watermarked, wood-free printing paper with a tactile 'handmade' appearance and feel. This product is designed for wine labelling, it is suitable for primary labelling of high and premium goods with an 'old world' image eg: spirits, specialist foods. This material is equipped with a permanent adhesive.

VERGÉ WHITE

A white uncoated, matt, laid watermarked, wood-free printing paper with a tactile 'handmade' appearance and feel. This product is designed for wine labelling, it is suitable for primary labelling of high and premium goods with an 'old world' image eg: spirits, specialist foods. This material is equipped with a permanent adhesive.

PET WHITE MATT

A laser-printable polyester film. It is distinguished by its very good toner coverage and keying properties when laser-printed. PET laser labels feature good resistance to weathering, extremes of temperature, chemicals and seawater. This material is equipped with an extra-permanent adhesive.

LCI

MATERIALS

PET SILVER MATT

A laser-printable polyester film. It is distinguished by its very good toner coverage and keying properties when laser-printed. PET laser labels feature good resistance to weathering, extremes of temperature, chemicals and seawater. This material is equipped with an extra-permanent adhesive.

PET TRANSPARENT GLOSS

A laser-printable polyester film. It is distinguished by its very good toner coverage and keying properties when laser-printed. PET laser labels feature good resistance to weathering, extremes of temperature, chemicals and seawater. This material is equipped with an extra-permanent adhesive.

PET TRANSPARENT MATT

A laser-printable polyester film. It is distinguished by its very good toner coverage and keying properties when laser-printed. PET laser labels feature good resistance to weathering, extremes of temperature, chemicals and seawater. This material is equipped with an extra-permanent adhesive.

PE WHITE MATT

The PE film is heat-stabilized and specially developed for laser printer applications. It can withstand short-term exposure to temperatures of up to approx. 180°C without significant shrinkage. PE laser labels are waterproof and weather-resistant. This material is equipped with an extra-permanent adhesive.

OFFSET

MATERIALS

WHITE MATT

A white, matt, wood-free offset paper. Specially designed to achieve very good printing results. Equipped with a permanent adhesive. The siliconized backing paper consists of a face-optimized kraftliner and ensures excellent processing characteristics for printing, cutting and die-cutting.

WHITE GLOSS

A cast coated, white glossy paper with very good printing properties, brilliant subject reproduction and high color anchorage ability. Equipped with a permanent adhesive. The siliconized backing paper consists of a face-optimized kraftliner and ensures excellent processing characteristics for printing, cutting and die-cutting.

YELLOW MATT

A matt, wood-free paper dyed in yellow. The use of Color is ideal wherever colored paper leads to faster recognition. Equipped with a permanent adhesive. The siliconized backing paper consists of a face-optimized kraftliner and ensures excellent processing characteristics for printing, cutting and die-cutting.

GREEN MATT

A matt, wood-free paper dyed in green. The use of Color is ideal wherever colored paper leads to faster recognition. Equipped with a permanent adhesive. The siliconized backing paper consists of a face-optimized kraftliner and ensures excellent processing characteristics for printing, cutting and die-cutting.

BLUE MATT

A matt, wood-free paper dyed in blue. The use of Color is ideal wherever colored paper leads to faster recognition. Equipped with a permanent adhesive. The siliconized backing paper consists of a face-optimized kraftliner and ensures excellent processing characteristics for printing, cutting and die-cutting.

RED MATT

A matt, wood-free paper dyed in red. The use of Color is ideal wherever colored paper leads to faster recognition. Equipped with a permanent adhesive. The siliconized backing paper consists of a face-optimized kraftliner and ensures excellent processing characteristics for printing, cutting and die-cutting.

GOLD MATT

A gold matt aluminum foil with a PVC based topcoat laminated to a white, wood-free printing paper. Equipped with a permanent adhesive. The siliconized backing paper consists of a face-optimized kraftliner and ensures excellent processing characteristics for printing, cutting and die-cutting.

SILVER MATT

A silver-matte aluminum foil with a PVC-based topcoat laminated to a white, wood-free printing paper. Equipped with a permanent adhesive. The siliconized backing paper consists of a face-optimized kraftliner and ensures excellent processing characteristics for printing, cutting and die-cutting.

RADIANT ORANGE MATT

A bright orange, one-sided coated paper, which is characterized by very high fluorescence in daylight. Our luminous paint materials are used where a high level of attention is required. Equipped with a permanent adhesive. The siliconized backing paper consists of a face-optimized kraftliner and ensures excellent processing characteristics for printing, cutting and die-cutting.

RADIANT RED MATT

A bright red, one-sided coated paper, which is characterized by very high fluorescence in daylight. Our luminous paint materials are used where a high level of attention is required. Equipped with a permanent adhesive. The siliconized backing paper consists of a face-optimized kraftliner and ensures excellent processing characteristics for printing, cutting and die-cutting.
